About McClure!

Welcome to McClure Electric

As leaders in the electrical industry, we distinguish ourselves through an unwavering commitment to excellence, combining meticulous attention to detail with unparalleled customer service. Our highly skilled team ensures that every project, regardless of size, is executed with precision, adhering to the highest safety and reliability standards. What sets us apart is our relentless focus on attention to detail—from the initial consultation to the final inspection.

At McClure Electric, customer service is not just a priority; it's the cornerstone of our business. Our client-centric approach and over 50 years of experience ensure your needs are not just met but exceeded.

About McClure

McClure Electric

Founded in 1966 by Thomas McClure, our electrical contracting firm has been a beacon of excellence in the industry for over half a century. With a legacy built on a commitment to exceptional customer service and embracing state-of-the-art technology, we have continuously raised the standard for electrical solutions. From the very beginning, we've prioritized client satisfaction, delivering reliable and innovative services that exceed expectations. At McClure Electric we combine decades of experience with cutting-edge expertise to power your projects with efficiency and precision.

McClure Communications

McClure Communications, your premier destination for state-of-the-art communication solutions. At McClure Communications, we're dedicated to providing you with the latest in technology, including fiber optics, data cabling, and more. With a focus on reliability, efficiency, and superior customer service, we empower businesses to thrive in an interconnected world. Discover the difference with McClure Communications and unlock the full potential of modern communication technology for your organization.

Electrical Contracting

Project Management

Projects are assigned to one of our team members to support your electrical needs from start to finish. McClure Electric, Inc., is a union shop that is signatory to the San Francisco Electrical Contractors Association. Our electricians are members of the International Brotherhood of Electrical Workers, which guarantees the most qualified electricians.

Emergency Power

Emergency backup power generator is one of those niche industries that is virtually invisible to the average person, unless, of course, the lights or voice/data go off for an extended period of time. We at McClure Electric have encountered these situations and have been successful in assisting our customers with all their emergency power needs.

Power Distribution

The electrical aspects of power distribution begins with an in-depth look at equipment, applications, and electrical requirements necessary for a seamless installation. Our problem solving skills in this area provide customers with quality work while keeping costs down.

Exterior Lighting

Like interior lighting, exterior lighting for buildings, sidewalks, streets, and parking lots should be task-specific and energy-efficient.

Fire Life Safety

Our specialty in Fire Protection/Life Safety equipment and systems includes, but is not limited to: smoke/heat detection systems and audible, visual, and voice evacuation systems. We ensure that all activities involving fire protection/life safety equipment and systems are conducted in compliance with all federal, state, and local regulations.

Nurse Call

McClure Electric understands the health care community's need for user friendly patient/nurse call systems with enhanced operational capabilities. Our highly-trained electricians are driven to be the best and pride themselves on completing the job according to specifications.

Lighting & Controls

The use of dimming systems, lighting control panels, and energy management equipment is increasing due to regulations and the clients' need for flexibility in office buildings. In addition, the energy and cost savings potential is tremendous.

Service Trucks

Our service trucks are equipped with radio/phones, and are dispatched seven days a week with 24-hour service to meet our clients' needs.

Data Communications

Project Management

Management of voice and data installations, for educational, commercial, hospitality, residential, retail, and health care institutions

Service Truck

Whether your troubleshooting needs are large or small, we have the trucks, tools, and technicians to solve your problem.

CAD

Our CAD department can provide a quality install by providing computer-aided as-built drawings upon project completion, as well as printing services.

Data/Voice/Fiber Optic Structured Cabling/CATV

McClure Communications offers complete voice, data, and video infrastructure cabling services. We install category 5e, 6, 6A (10 Gig), and fiber optic cabling systems to meet our customers' growing needs.

Voice & Data Services

McClure Communications has partnered with local IT and phone vendors, to offer our customers a combined solution to ensure a seamless transition.
